

# ROUTINE CABINET CARE

CABINETCORP™

THE KEY TO KEEPING YOUR CABINETS IN THE MOST PRISTINE CONDITION IS THE CARE AND REGULAR MAINTENANCE. FOLLOW OUR ROUTINE CABINET CARE TO BETTER UNDERSTAND YOUR CABINETCORP CABINETS.

## WHAT TO DO

### SPECIAL ATTENTION

Pay special attention to the dishwasher and sink area, as water and humidity can warp your cabinetry. Be sure to clean up water splashes immediately.

### REGULAR DUSTING

Dusting your cabinets regularly can prevent build-up and discoloration on your cabinets. Use a feather duster, Swiffer duster, or a dry microfiber cloth.

### DEEP CLEANING

Deep clean your cabinets 1-2 times a month. Use mild dish soap, warm water, and a microfiber cloth. Gently wipe your cabinets with a microfiber cloth. Then immediately dry with a dry cloth.

#### BEST SOLUTION MIXTURE

- 2 tablespoons of mild dish soap
- 2 cups of warm water

## WHAT NOT TO DO

### HARSH CHEMICALS

Cleaning your cabinets with the proper cleaning product is key to long-lasting cabinetry. Try to avoid harsh solvents.

#### AVOID THESE SOLVENTS

- Powdered Cleaners
- Ammonia
- Bleach
- Citrus Cleaners
- Wax Based Cleaners
- Polishing Products

### ROUGH SCRUBBING MATERIALS

Rough scrubbing materials can damage the paint or leave unwanted residue.

#### AVOID THESE MATERIALS

- Scouring Pads
- Steel Wool
- Magic Erasers
- Paper Towels
- Dish Cloths
- Sponges

# LONG-TERM CABINET CARE

## REGULAR CLEANING

Clean out your cabinet's contents, then start vacuuming out any debris. Followed by the previous method for Deep Cleaning. If there are any caked-on substances use soap, water, and some baking soda.

## HARDWARE CARE

Use the same soap and water solution from the Deep Cleaning Method to keep your hardware brand new.

### AVOID THESE SOLVENTS

- Harsh Chemicals
- Silver Polish
- Brass Polish

## HINGE & GLIDE CARE

### 1. UP/DOWN ADJUSTMENT

The up/down adjustment helps to align doors and drawer fronts to each other.

### 2. LEFT/RIGHT ADJUSTMENT

The left/right adjustment can be used to move the entire drawer front or just the top or bottom half of the drawer front.

### 3. IN/OUT ADJUSTMENT

The in/out adjustment moves the drawer front closer or away from the face-frame

### 4. RELEASE LEVER

Pull this lever on both the left & right glide clips to release the drawer box from the glides.

### 1. UP/DOWN ADJUSTMENT

The up/down adjustment helps to align doors and drawer fronts to each other.

### 2. LEFT/RIGHT ADJUSTMENT

The left/right adjustment can be used to move the entire door or just the top or bottom half of the door.

### 3. IN/OUT ADJUSTMENT

The in/out adjustment moves the door closer or away from the face-frame.

# TOUCH-UP CARE

## TOUCH-UP KITS

- PAINT PEN
- FILL STICK
- BUFFER PAD
- APPLICATION CARD

### LIGHT SCRATCHES & RUBBED EDGES

Fill in light scratches and rubbed edges use:

- Paint Pen (Marker)
- Buffer Pad

How to Use:

1. Shake Marker Thoroughly
2. Depress Tip on Tip Panel or Cardboard  
\*Do not to flood the tip
3. Apply to Scratched Area with Smooth Strokes
4. Allow Several Minutes to Dry Thoroughly
5. Remove Excess Paint from Pen with Buffer Pad

### SHERWIN WILLIAMS COLOR MATCH

CabinetCorp is listed in Sherwin Williams National Database as BGI, you will want to mention this when visiting or calling Sherwin Williams location.

#### SHERWIN WILLIAMS PROCESS:

1. Browser
2. Click the Marketing Tab
3. Click the National Accounts tab
4. Click Account Profile - New
5. Enter Customer Name - BGI

Throughout time your cabinets may encounter some small dings and chips. Luckily, we offer Touch-Up Kits to help hide those small damages to your cabinetry.

### SMALL DEFECTS & OPEN JOINTS

- Fill Stick
- Application Card

How to Use:

1. Gently Fill in Desired Area with Fill Stick
  - Stroke in the same direction of scratches
  - Stroke in the same direction or woodgrain for worn areas
2. Remove Excess Product with Application Card Until Surface is Smooth

If you are visiting a local retail location, they will be able to provide you with just a latex finish paint only.

If you are trying to paint something that you built for your project to match exactly, we do recommend contacting a Performance Coating Location and use a Conversion Varnish- this will match our cabinetry exactly.

\*\*\*If you are needing stain, you will only need to contact the Performance Coating Locations. Just keep in mind with stain, that colors can alter depending on the type of wood you are using.

### PAINT CODES-TRADITIONAL PRIME

Shaker Antique White ————— BGI-SA  
Shaker Dusk ————— BGI-SD  
Shaker Gray ————— BGI-SG

Shaker Charcoal Gray ————— BGI-SC  
Tacoma White ————— BGI-TW  
Cambridge Antique White ————— BGI-CW  
Cambridge Sable ————— BGI-CS

# ENVIRONMENTAL EFFECTS

## NATURAL ELEMENTS

SUNLIGHT

Exposure to sunlight can cause permanent unwanted effects to your cabinets over time. CabinetCorp applies UV protecting agents in all paints and stains. Prolonged exposure can alter your cabinet color by fading or darkening the finish. To prevent any damage utilize window coverings to help block sunlight.

CLIMATE

Humidity and excessively dry atmospheres in the home are not friendly environments for your cabinetry. Wood naturally expands and contracts. High humidity can increase the expanding and drier conditions can increase the contraction. Over time, if these conditions are not controlled within the home, it can increase the likelihood of swelling and cracks within the joints of the door and drawer fronts and the frame.

HIGH HEAT

The heat that escapes from the oven during the self-cleaning process can damage the cabinets. To prevent heat damage remove your cabinet doors and drawers closest to the oven.

SMOKE

Smoke from cooking or Tobacco can discolor your cabinetry. Be sure to properly ventilate the area with the cabinets to prevent discoloration.

MOISTURE

It is imperative to keep your cabinets free from unwanted moisture. If your cabinets become wet, dry them immediately with a clean lint-free microfiber cloth. Never drape damp rags over your cabinetry as this can cause **permanent damage** to the doors and drawers, and be sure to keep them free of steam from household appliances (dishwashers, pressure cookers, etc.).
